Mutare Among Featured Exhibitors at InAAU International Conference

SCHAUMBURG, IL – Mutare Software participated as a Gold Sponsor in the 2008 International Alliance of Avaya Users (InAAU) conference, held in San Diego March 30-April 3. The conference, titled “The Art of Evolution: Transforming Technology into Reality,” drew several thousand attendees, including Avaya business partners, customers, and other IT industry experts from around the world.

Mutare President Ben Crown and Regional Manager Sharon Scott were among the featured break-out session speakers. Crown’s discussions included an overview of advanced applications for MM, while Scott addressed enterprises solutions for emergency notification. Mutare is Avaya’s leading unified communications solution provider as well as a well-known innovator in business continuity solutions.

Mutare, a Premier Avaya DevConnect member, joined more than 60 exhibitors at the event. Mutare representatives demonstrated the ease of Enabled VoiceMail (EVM) for Avaya as well as the power of Emergency/Event Notification (EEN), both Avaya-compliant applications. EVM, which delivers voice and fax messages to the user inbox without the desktop plug-in, works with all Avaya voicemail systems. EEN, which automates the rapid delivery of announcements to targeted groups through voice, text and email broadcasts, combines the power of a mass emergency broadcast system with the ease of an everyday notification tool.

Mutare Software, an Avaya Platinum DevConnect member, focuses on interactive voice and Web applications for Unified Communications, Business Continuity, and Custom IVR that enhance service and lower costs. Mutare is proud of its reputation for quality service and support as evidenced by the thousands of Mutare applications successfully deployed for customers throughout the world.

communications, respond to emergencies, meet regulatory requirements and increase productivity.
