

### Speech to Text Extended to MM with Exchange

Mutare Software, first-to-market with a voicemail-to-text application for Avaya voicemail, has now extended this revolutionary new offering to include MM environments with the Exchange backend. Released for general availability in October, Speech to Text combines the unified messaging technology of Mutare's EVM with a voicemail to text conversion service to create a unique, and total, unified messaging experience for the enterprise user. With this most recent release, Speech to Text, an Avaya-compliant solution, now works with all Avaya messaging platforms and all enterprise email systems. For more information or to sign up for an upcoming webinar, visit the Mutare website, [www.mutare.com](http://www.mutare.com), or contact a Mutare representative in your area: <http://www.mutare.com/contact.asp>. Special pricing on the EVM portion of the solution is available for MM with Exchange.
