

Mutare giSTT Speech To Text Requirements	Document #: 224
	Last Update: 04/27/2010
	Page: 1 of 1

Overview

This document is used in conjunction with Document *154-App Server* and requisite EVM Plus Pre-Install document. We recommend downloading the most recent version from www.mutare.com.

There are two sections to this document. Use the section that is applicable to your application configuration:

1. giSTT Speech To Text (giSTT) Server in the Cloud – The Mutare Application Server communicates with a giSTT service in the cloud.
2. giSTT Speech To Text (giSTT) Server Co-Resident – The Mutare Application Server communicates with a server that is co-resident with the Mutare Application Server. This server can be behind the customer firewall.

Site Configuration

Site Information	
Site Name
