

Mutare Voice™ Spam Filter

Higher Education

Filtering Voice Spam Minimizes Digital Distraction Enabling Greater Focus on Learning

Voice spam, including robocalls, abusive callers, scam calls, and annoying sales calls, cause employee frustration, lost productivity and damage your bottom line. For administrators and faculty who handle information from students, donors and alumni, there's no faster way to damage those relationships than with constant interruptions from voice spam.

The Mutare Voice Spam Filter feature guards your voice network by filtering incoming calls, allowing legitimate calls through while blocking spam callers. It can be deployed as a stand-alone filtering system or as part of an overall call completion solution.

Features

- Enterprise specific whitelist and blacklist management
- Dynamic robocall filtering with caller ID spoof detection
- Simplified administration and rules management
- Advanced reporting and analytics for spam filter tuning

Benefits

- Prevents digital distraction to optimize productivity
- Reduces risk associated with fraud and phishing scams
- Integrates with existing voice technology to ease burden of IT and telecom staff

"Important messages are often buried under spam calls, and the blinking red message waiting light doesn't tell you anything about the caller, so a lot of time is wasted getting to messages that matter."

- Chris Day, Managing Partner
D'Arcy Johnson Day
