

# Mutare Voice™ Spam Filter

## Law Firms

## Enterprise Voice Spam Call Defense Enables Focus on Clients for Law Firms

Voice spam, including robocalls, abusive callers, scam calls, and annoying sales calls, cause employee frustration, lost productivity and damage your bottom line. For lawyers who are required to handle sensitive information divulged by clients in face-to-face meetings, there's no faster way to damage client relations than with constant interruptions from voice spam.

The Mutare Voice Spam Filter feature guards your voice network by filtering incoming calls, allowing legitimate provider and clients through while blocking spam callers. It can be deployed as a stand-alone filtering system or as part of an overall call completion solution.

### Features

- Enterprise specific whitelist and blacklist management
- Dynamic robocall filtering with caller ID spoof detection
- Simplified administration and rules management
- Advanced reporting and analytics for spam filter tuning

### Benefits

- Prevents digital distraction to optimize billable hours and back office staff time
- Improves workflow and efficiency
- Integrates with existing voice technology to ease burden of IT and telecom staff

"Important messages are often buried under spam calls, and the blinking red message waiting light doesn't tell you anything about the caller, so a lot of time is wasted getting to messages that matter."

- Chris Day, Managing Partner  
D'Arcy Johnson Day
