

Mutare Voice™ Pre-Install

This document outlines the necessary requirements for installation of the Mutare Voice application in the Mutare Secure Cloud. In many cases, a VPN tunnel will be required from the Mutare Secure Cloud to the customer location. The VPN tunnel can support SMTP sending, Skype for Business sending as well as Active Directory (AD) login authentication for the Mutare Voice web application.

Please select appropriate options for your Mutare Voice Setup

- Implementing giSTT (Speech to Text): Yes No
- Choose available notification types:
 - Email notifications Yes No
 - SMS notifications Yes No
- Single Sign On (SSO) Yes No
- Active Directory Synchronization (See Document 296) Yes No
- Expected user count for Mutare Voice: _____
- In order to test the application, Mutare requires a permanent DID phone number that the installer can call which will then route to the Mutare Voice server via SIP. Mutare will continue to use this test mailbox/extension to monitor the application.
 - Direct dial (DID): _____
 - Ext. associated with that DID: _____
- If a DID cannot be provided, please provide the main access number where an extension can be dialed:
 - Main access number: _____
- Auto Attendant (AA) Yes No
- Message Waiting Indicator (Requires an additional VM) Yes No
