 - <https://api.mutare.com>
- Access to external monitoring service (port 443)
 - <https://joshua.es.centralus.azure.elastic-cloud.com>

Backups and Anti-Virus Software

Mutare's recommendations for backups and anti-virus software are:

- Periodic snapshots of the virtual machine are required.
- If the SQL database for Mutare Rules Engine is deployed at the customer's datastore, then periodic backups of that database are required.
- Anti-virus: Feel free to install anti-virus software as required by your organization.
